

SIMPLY CLEVER

**Škoda** Fabia Combi,  
Fabia Sedan

## design & comfort

**The exterior design of the Škoda Fabia presents a solution pursuing immaculate functional performance.** Currently, you can choose from two versions: the attractive compact combi or the traditional sedan.

The standard equipment of Škoda Fabia cars provides unrivalled comfort of the car with the biggest interior space in its category. Other equipment can only enhance the comfort of the driver and the passengers alike.

3-7	design & comfort
8-13	safety & technology
14-19	interiors & equipment
20	accessories
21	general information
22-23	technical specifications

## “Designed for perfection of shape”

**1. SunSet – windows with a higher density of tint in the rear part of the vehicle** are simultaneously an elegant feature and a highly functional element of the car design. Tinted glass accentuates the attractiveness of the Fabia model while protecting the passengers from solar radiation as well as inquisitive looks from the outside.

**2. Xenon headlamps with dynamic adjustment** embellish the car with sports style. Besides the attractive design, the headlamps lessen eye fatigue when driving at night thanks to their higher luminous power, coupled with lower power demands and longer service life compared to halogen bulbs. Xenon headlamps are available from the Ambiente version upwards.

**3. Rear lights** optically broaden the rear part of the vehicle. They feature the “C” shape, typical for Škoda cars, so an observer can tell a Fabia Combi or a Fabia Sedan from their rear lights alone.

**4. A front grille** with vertical ribs dominates the front of the car. This traditional distinguishing mark unquestionably underlines being part of the Škoda brand.

## “Comfort to make every day exceptional”

**1. An umbrella compartment** is a practical design element of the combi model. It can be found on the luggage compartment roller cover, just behind the backrests of the rear seats. It is designed for wet umbrellas too.

**2. A foldable armrest between the rear seats** is designed primarily to increase the comfort of passengers travelling in the rear. However, it can serve just as well as storage for miscellaneous small objects. Folded,

it turns into a backrest for a third passenger sitting in the centre of the rear seat.

**3. A pop-up cup holder** integrated into the dashboard will come in handy at any time, not just in summer. It is a practical optional piece of equipment, which remains hidden within the dashboard when not needed.

**4. A foldable drinks compartment**, complete with a practical pen holder, has been included

in the standard equipment of Fabia models. The compartment is located underneath the steering wheel on the left, and is even chilled in models fitted with air conditioning.

**5. The glove compartment** on the front passenger side is so spacious it can accommodate a 1.5l bottle easily. In air-conditioned cars, the bottle can be chilled in the glove compartment. The compartment is also fitted with a practical pen holder, and is illuminated in the Elegance version.

**6. A foldable key with remote control central locking** fits into the palm of the hand, but that does not mean it is a mere detail. The remote control can lock and unlock your car from a distance of as much as 10 metres. The upper button secures the locks, the lower one unlocks them and the middle button controls the boot lock.

**7. The electric sunroof** is not a matter of fashion or a spur-of-the-moment idea.

It is a reflection of your lifestyle, your freedom. Powered sunroofs in sliding or tilting designs are available as optional equipment for both models.

**8. The luggage compartment** of the Fabia Combi has a volume of 426 litres, while the Fabia Sedan offers a volume of 438 litres. The rear seats of both models can be folded completely or split 60 : 40, making transportation of even longer objects an easy task.

**9. Folding the rear seats** provides the combi model with a luggage space of an incredible 1,225 litres, and the sedan model with a space of 789 litres.

**10. The Net Programme** is available for both models, making sure that none of your cargo shifts or tilts during transport. The single safety net is designed for various uses.

## safety & technology

**The Škoda Fabia is well prepared for any contingency.** During any ride you can rely on its very rigid body with robust columns, double struts in the doors, computer-designed deformation zones, as well as numerous other elements of both passive and active safety, including state-of-the-art electronic systems. All models can be equipped with ABS (Anti-lock Braking System) as well as Dual Rate and MSR systems (engine drag moment control). Those wishing to have things even more under control can opt for the ASR (traction control system) and stabilising ESP (Electronic Stability Programme) diminishing the risk of skidding when negotiating turns.

## “Safety for a carefree drive”

**1. Airbags** significantly increase your safety. Both Fabia models are fitted with a driver's airbag by default and, in addition, can be equipped with a passenger's airbag and side airbags.

**2. Two Isofix child seat fittings on the outer rear seats** are included in the standard equipment. Child safety seats of this type are attached directly to the car body and thus become a fixed component of the vehicle. Both Fabia models provide sufficient room for two

child seats, providing your children with safety and comfort. If you wish to place the child seat on the front passenger seat and the car is fitted with a passenger airbag, this airbag must be deactivated.

**3. The rear parking sensor** comprises four sensors monitoring the distance from the rear bumper to the nearest obstacle. When reversing, an acoustic alarm gives you a clear indication of the distance available, with increasing frequency denoting diminishing space.

**4. A third headrest** and 3-point safety seat belt for a rear seat passenger will be a welcome feature for those utilising the full capacity of their car. When the full capacity is not used, the central headrest can be pushed in and folded, providing the driver with an unrestricted view through the rear window.

**5. The dashboard** for the Fabia models has been designed with regard for safe driving. It is elegant yet simple, so it does not divert the driver's attention. All control elements are within easy reach, and once you hold the 4-spoke steering wheel, you will find out how well it fits into your hands.

**6. Electrically-adjustable heated external mirrors** go some way towards increasing the driver's comfort as well as safety.

**7. Electric windows** will become a matter of course within moments, and you will be unable to imagine having a car without this equipment. Models fitted with electric rear windows are also equipped with a safety lock preventing children from tampering with them.

**8. Air conditioning with automatic regulation** is a guarantee of a comfortable interior climate, yet another prerequisite of safe driving. Controlling the air conditioning system is very simple. You just set the desired temperature of

the incoming air, which is then either heated or cooled as necessary. Air-conditioned cars also chill the contents of storage compartments in the dashboard.

**9. Cruise control** contributes to lowering the driver's fatigue, in particular when required to drive for considerable stretches of time. Once you reach the desired speed you set the system to maintain it using a lever underneath the steering wheel. The cruise control system then maintains it automatically.

## “Technology for exceptional experience”

**1. A combined instrument panel** with a unique graphical solution provides exceptional readability and clarity of displayed information. The pleasing green backlight does not disturb the driver's attention and does not tire the eyes even on long journeys.

**2. The large dot-matrix MaxiDOT display** is an optional piece of equipment provided along with the navigation system. Information on the route, distance travelled, outside temperature etc., is then shown within your field of vision.

**3. Manual transmission** is likely to be favoured by those who cannot imagine driving without handling the gear stick. The ergonomic shape and easy accurate handling make changing gears in the Fabia a pleasure. 5-speed manual transmission is provided by default with all engine versions.

**4. Automatic transmission** increases the driving comfort. It helps the driver when starting and makes driving in dense traffic more bearable. Automatic transmission is available for cars fitted with 1.4/55 kW engines.

**5. The MS 202 radio** is fitted with a tape player, AM/FM tuner with the RDS system, automatic switching off, safety code and removable front panel. It also features traffic information reception and memory for six preset radio stations.

**6. The MS 402 radio** provides the same features as the MS 202, plus more – for example the possibility of connecting a CD changer, hands-free set, automatic volume decrease when making a phone call, manual setting of treble and bass etc.

**7. The Symphony radio with a CD player** is the top model on offer for the Fabia Combi and Sedan. Its wealth of features includes, besides functions of the MS 402, electronic encryption making the radio unusable in any other vehicle, volume control linked to the driving speed etc.

**8. The navigation system**, which includes a radio with a CD player, can communicate in several languages. It provides vocal and graphic

instructions, such as warning before turning off the current road, information on remaining distance to be travelled, estimated time of arrival, etc. Information can be monitored both on the navigation system display as well as on the MaxiDOT display. The dynamic TMC module of the navigation system enables reception of traffic information en route and adjustment of the planned route accordingly.

**9. The phone preparation set** comprises wiring, an aerial, universal interface, a holder and a built-in microphone.

**10. The 6-CD changer** in Fabia models is installed beneath the front passenger's seat.

interiors  
& equipment

**You can express your style through the equipment of your car.**  
The Fabia Combi and Fabia Sedan models are available in three equipment versions, supplemented with a broad range of extra equipment.

Fabia Elegance interior

**Classic** – Fresh Onyx interior  
Onyx-Onyx dashboard

**Classic** – Fresh Achat interior

**Sports interior Dynamic**  
Onyx-Onyx dashboard  
Onyx-Achat dashboard  
Onyx-Ivory dashboard

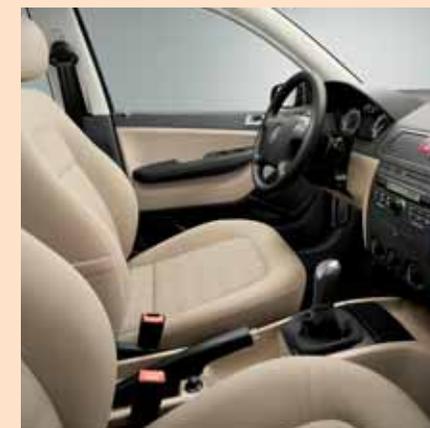

#### FABIA CLASSIC

The Classic version with the Fresh interior is an example of colour harmony and cosiness. The dashboard finished in the Onyx-Onyx colour scheme is best supplemented with Onyx upholstery in a combination of grey and black. The Fresh interior is also available with Achat upholstery and the Onyx-Achat dashboard finish.

#### FABIA AMBIENTE

The Frome interior, available for the Ambiente version, will surround you in easy comfort. The dashboard in Onyx-Achat is ideally combined with Achat upholstery, but can be supplemented with Onyx upholstery as well. Or you can follow your taste and choose another alternative, the Onyx interior, combined with the Onyx-Onyx dashboard finish.

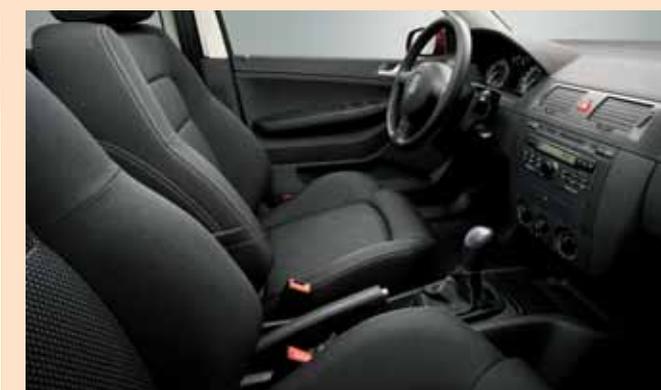

#### FABIA ELEGANCE

The Elegance version lives up to its name. The Fose interior is certain to please your desire for individuality and pamper you with the highest degree of elegance of any alternative. The dashboard in Onyx-Ivory is a pleasure to behold. The Ivory upholstery brings the interior to just the right level of comfort. Also available is the dark Onyx interior with the Onyx-Onyx dashboard.

#### FLERET INTERIOR – LEATHER/ARTIFICIAL LEATHER

The Fleret interior is an attractive option for strong personalities and anyone striving for exceptionality. Seats in leather/artificial leather, combined with a leather finish on the steering wheel, leather gear stick knob and sleeve and leather handbrake handle turn the interior of your car into a space of luxury you will struggle to leave. The leather/artificial leather interior is optional for the Elegance interior version. A small leather package, comprising the above features except leather seat upholstery, can also be ordered for the Classic version and upwards.

#### SPORTS INTERIOR DYNAMIC

The sports interior Dynamic is certain to appeal to any sports-minded driver, pervading the car with sports elegance, providing the car and you alike with originality and dynamism. The front seats are made in a sport design with Onyx upholstery, specially shaped, and bound to surprise you with their comfort. The 3-spoke steering wheel, exclusive to the sports interior, will bring an exciting experience to every touch, just as with the leather gear stick knob and sleeve and leather handbrake handle. The sports interior package can be ordered for the Classic version and upwards.

Steel wheels 5.0J x 14" with 165/70 R14 tyres and **Duron** hub covers. Standard equipment for the Classic version.

Steel wheels 6.0J x 14" with 185/60 R14 tyres and **Tucanus** hub covers. Standard equipment for the Ambiente version.

**Sprint** alloy wheels 6.0J x 14" with 185/60 R14 tyres. Extra equipment for the Classic and Ambiente versions; standard equipment for the Elegance version (except for the 2.0/85 kW engine version).

**Band** alloy wheels 6.0J x 15" with 195/50 R15 tyres. Extra equipment for the Ambiente and Elegance versions; standard equipment for the Elegance 2.0/85 kW engine version.

**Poli** alloy wheels 6.5J x 16" with 205/45 R16 tyres. Extra equipment for the Ambiente and Elegance versions.

# Škoda Genuine Accessories

Škoda Genuine Accessories will let you underline the uniqueness of your car while adjusting it to your particular lifestyle. These accessories serve to expand the standard and extra equipment. All products offered as Škoda Genuine Accessories have been individually approved by Škoda Auto, giving you a guarantee of long service life, reliability, safety, original technical solution, accuracy and preservation of the warranty on the car. You can obtain further information on the complete range of Škoda Genuine Accessories at any authorised Škoda partner.

**1. A trunk grille** for the Fabia Combi is a must for all dog lovers as well as those who intend to utilise the full volume of the boot or to transport cargo without the risk of it falling into the passenger compartment.

**2. A rubber boot mat** provides exceptional protection of the upholstery when transporting soiled cargo. Its surface finish also prevents unwanted movement of transported objects, while simplifying maintenance.

**3. Decorative door sill covers** are another example of a dual purpose accessory, fulfilling its aesthetic role as well as a practical one, protecting the sills from mechanical damage.

**4. Snow chains** become an indispensable helper under certain circumstances. They can be easily mounted without any need to move the vehicle intermittently.

## General information

### ŠKODA SERVICE

Dear Škoda vehicle owners,  
We offer you numerous reasons for visiting your authorised Škoda service partner.

#### Quality of the service network and personnel

The types of technology we integrate into your vehicle continue to become more and more advanced; therefore, our service personnel must adequately improve their professional knowledge. Authorised service centre workers regularly receive technical and also non-technical training provided by the manufacturer in order to obtain the latest knowledge for their work.

#### Quality of the service level monitoring system

Our goal is to meet your requirements in the best possible way; that's why we introduced our new service level monitoring system in our whole sales network – from the manufacturer up to individual service partners. It guarantees a high level of customer care and repair processes.

#### Quality of the repair level and customer care

Anytime your Škoda vehicle "calls" for service, call us and we will gladly schedule your individual appointment. That will give us enough time for the best possible care. Your Škoda vehicle needs and requires state-of-the-art types of technology. Only technological procedures specified by the manufacturer and the most advanced workshop equipment and diagnostic systems are able to guarantee the flawless operation and reliability of your vehicle.

Our work philosophy is based on the fair and transparent treatment of our customers. Following that philosophy, we set standard time units for vehicle repairs and maintenance. Only this mechanism allows us to provide you with a good repair price estimate. Our authorised Škoda service partners will provide you with a repair price estimate before the work starts. As a result of that, you are informed about the repair price in advance. If your vehicle needs more care than originally expected, our authorised Škoda service partners will immediately inform you and arrange further steps with you so that you always have the costs under control.

#### A comprehensive offer of services

From time to time your Škoda vehicle needs our expert care, either during its regular maintenance, any repairs or if you wish to purchase or borrow Škoda Genuine Accessories. We are ready for all these situations and we will always take care of both your vehicle and your mobility.

Your authorised Škoda service partner will gladly inform you about our specific offers.

### ŠKODA GENUINE ACCESSORIES

Genuine accessories make every vehicle unique, giving it its own style. The Škoda Fabia comes with very extensive basic equipment; however, some of the additional items can only be purchased as Škoda Genuine Accessories. These items include, for example, child safety seats, roof rails, mobile phone adapters and alloy wheels. The extra equipment offer also extends to mechanical security items and a whole series of items increasing the vehicle's utility value and individuality. Our catalogue of Fabia equipment contains more detailed information on the Škoda Genuine Accessories range.

### ŠKODA GENUINE PARTS

Škoda Genuine Parts are identical to those used during the assembly of Škoda vehicles. The vehicle manufacturer knows best which part is intended for which functionality and the required parameters it needs to meet unconditionally for the car to function properly.

#### Safety

Every vehicle component and part has its own purpose and some of them directly determine the safety of the car's occupants. Our care for safety is proven in, for example, body structure, airbags, safety belts and most importantly in the brake system. The lives of the people in and around the car depend on the quality and operating efficiency of the brakes, especially under extreme conditions.

#### Availability

Thanks to the large network of authorised Škoda service partners, all Škoda drivers can be assured that they will be able to get the parts they need for their car. Škoda Auto offers a comprehensive range of parts and equipment items that are used in the vehicle's production, and does not merely focus on high-turnover parts. The supply of Škoda Genuine Parts is provided even after the relevant vehicle model is discontinued, and not just for the period specified by law: indispensable components for the operation of the car are supplied to the market for at least 15 years after the discontinuation, car equipment components are supplied to the market for at least 10 years after the discontinuation and components of door lining and carpets are supplied to the market for at least 8 years after the discontinuation.

#### Top quality

To verify quality parameters, the development department maintains an extensive testing facility including a test circuit with extreme polar and desert conditions, as well as material testing laboratories of the quality control department. Thanks to use of first-rate materials and technologies, Škoda Genuine Parts ensure safe and carefree driving. Precise alignment guarantees replacement of worn parts without unnecessary complications.

#### Long life

The use of first rate materials and top production technologies in the production of Škoda Genuine Parts ensure their maximum reliability and long life.

#### Original technical solutions

The knowledge gained in production and operation is continuously reflected in the search for new technical solutions aimed at obtaining a truly first-rate product, which will meet the customer's requirements.

#### Legislative requirements and certification

All Škoda Genuine Parts meet the legislative requirements and are approved by Škoda Auto on the basis of meeting stringent criteria. This way the customer obtains a guarantee that the components installed in their vehicle will be reliable, functional and safe.

#### Protection of the environment

The Škoda Genuine Parts range includes exchange parts whose production does not burden the environment with waste, excess heat and water pollution to a high degree. Returned parts and aggregates are not discarded but modified for re-use, thus re-utilising a great part of the work and energy invested in the parts during their manufacture.

### INFORMATION ON THE INTERNET

Information is available at [www.skoda-auto.com](http://www.skoda-auto.com) to assist you in deciding which vehicle suits your needs thanks to the detailed descriptions and photographs of all our models. Our Configuration program will let you try various combinations of standard equipment, engine, paint colour, interior, and extra equipment to make sure your new vehicle accurately meets your requirements. This program will also assist you with the calculation of optimum monthly payments for vehicle financing and the selection of a suitable dealer.

### ŠKODA FINANCE

If you select the Škoda Fabia vehicle, ŠkoFIN will assist you with financing it. The ŠkoFIN Company offers programs both for individuals and legal entities. Our Škoda Finance brand product line offers both lease and loan financing. You can contact one of our authorised Škoda partners to arrange and sign an agreement and to learn more about our product offer or the convenient special offers from ŠkoFIN. These are time-limited; however, they bring very unique and interesting benefits.

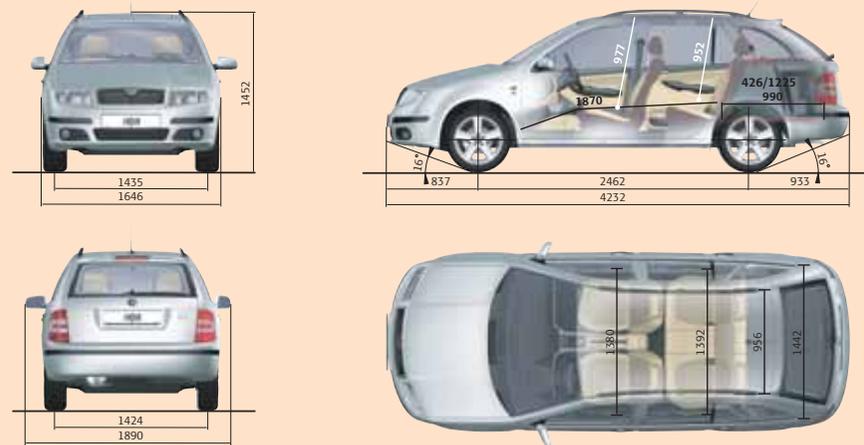

### FLEET SALES

Whether your car fleet is small or large or whether you are a customer from the business or public sector, Škoda Auto and its authorised dealer network are here for you. We offer products and services tailored to your business and financial needs, including top-quality customer care, a portfolio of services corresponding to the specific requirements of corporate customers and a high quality of cars, accessories and maintenance services, which are a guarantee of low operating and ownership costs of your car fleet.

- \*\*\*\*\* Track depends on the wheel size.
- (A) Automatic transmission.
- ≈ Applies to the 74 kW and 85 kW engine versions.

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cathaphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses Škoda Auto's awareness of responsibility for, and attempts at, the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes

(including changes of technical parameters or individual model equipment). Please consult your authorised Škoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
